

OPC IV Acetylcysteine (NAC) Frontline Provider Sessions

The Ontario Poison Centre (OPC) is offering brief, 15-minute drop-in Zoom sessions to support the rollout of the updated IV acetylcysteine (NAC) protocol for acetaminophen toxicity, effective **April 1**.

Sessions will be led by OPC poison specialists and will review the updated protocol, walk through the corresponding patient care resources (including where to access them), and provide time for questions.

OPC supports both a **1-bag** and a **2-bag** method for IV NAC administration. **These are not different protocols**- the dosing and course of treatment are identical.

Please join the session that corresponds to the method that will be used at your site.

No registration is required. The zoom link below will allow you to join any session.

[*Use this Zoom link to join any session listed below.*](#)

Date	09:30 ET	11:30 ET	14:00 ET
Mon Mar 23	1-bag	2-bag	1-bag
Tue Mar 24	2-bag	1-bag	2-bag
